

# 6th Year school trip 2011

## *An astronomic trip to TENERIFE!*

For: everyone who's interested in nature and 'night sky' (astronomy - views of the stars, moon, planets...)

What: Werner Haemelinck (responsible for the urania public observatory) will guide us. We discover the wonderful world of astronomy. We certainly will learn more about it. Star charts, the Sun, deep sky objects, telescopes, Costa del silencio, yellow mountain, volcano, Teide national park, Los Roques de Garcia, observatory Izana, flora, fauna, botanic garden, Santa Cruz, Taganana, Candelaria, ITER (alternative energy), Montaña Pelada and a visit to El Medano, red Mountain, playa Tejita, Faro de Rasca,.....are a few things to discover !

When: from Saturday till Saturday - you will receive further information later on

Lodgements: in West Haven Bay - apartments for 6 students - supper and breakfast in the restaurant of the complex

**West Haven Bay** is situated at the Costa del Silencio, in the most southern part of Tenerife. This area goes alongside the coastline. The airport Reina Soifa is situated at 15 minutes driving distance from West Haven Bay. The charming fishing village Las Galletas is situated at walking distance and the bigger cities Los Cristianos and Playa de las Americas are perfectly reachable by public transport.

On the island we travel by minibus and on feet.
