

6th year trip/Voyage de 6^{ième} année/Studienfahrt

Destination Destination Ziel	TENERIFE
Travel dates Dates du voyage Reisedaten	Probably Friday, April 24th – Thursday, April 30th 2019
Accompanying teachers Professeurs accompagnateurs Begleitlehrer	MRS DE VRIES TRINS Mr LORENZEN Björn +2 other teachers
Number of students Nombre d'élèves Schülerzahl	40
Educational goal Objectif pédagogique Ausbildungsziel	This is an educational trip where you can learn a lot about nature, volcanism, geography and the “night sky” (astronomy – views of the stars, the moon and planets). It is all about discovering Tenerife in an alternative way with a group of fellow students who you don't necessarily know well before leaving on the trip.
Student profile Profil d'élèves Schüleranforderungen	You have to enjoy hiking because every day we do quite a lot of it and sometimes it can be quite strenuous. You need to be interested in geography, history and culture. You don't mind getting up in the middle of the night to go watch the stars and if you like cooking, it is a welcome extra.
Program Programme Programm	<p><u>Day 1</u> Flight to Tenerife. Transfer to the hotel and getting settled at the hotel. (small cottages with 1 or 2 bedrooms for 2 to 6 persons) Lunch – picnic Meeting our guide, Werner. Discussion of the program Exploring the environment: Costa del Silencio + yellow mountain (an old undersea volcano) Introduction to astronomy (use rotating star charts,...) Dinner in the hotel</p> <p><u>Day 2</u> Las Canadas del Teide – Pico Viejo – Parador – Los Roques de Garcia – Villaflor</p> <div style="display: flex; justify-content: space-around;">   </div>

The origin of the Canary islands
Volcanism
Walking – for at least 4 hours

Dinner in the hotel
First evening on the TEIDE : the discovering of the main spring constellations
Back in the hotel after midnight.

Day 3

Walking : Las Canadas del Teide – part 2
Montana Blanca + Visitor centre and botanical garden
Flora of the Canary islands
Observatories Izana
Swimming pool at the hotel.
Cooking contest.
Free evening.

Day 4

Masca

Masca is one of the most picturesque parts of the island and is the tip of the northwest that is covered by the Teno Mountains.
Deep ravines interlaced with lush green flora accompany the winding roads.
The road leading from Buenavista del Norte passes along narrow hairpin bends towards the village of Masca.
It was until recently virtually unknown, but has now become a centre of attraction for those touring the island. The setting of the village is magical and its houses perch precariously on the narrow ridges of dramatic rock formations.
Reputed to have been a Pirate hideaway, the small Bay of Masca on the coast is a three-hour walk from the village through stunning scenery.

Dinner in the hotel

Day 4

The north-east of Tenerife :
Santa Cruz – Taganana - Candelaria

Santa Cruz, capital of the island and province, was initially founded on the beaches of “Añazo”. These days it is a bright and modern city which has known how to look after its historical sights. The heart of Santa Cruz consists of the squares of “ La Candelaria” and “ Plaza de España” opposite the bustling harbour. We visit the only white sand beach of Tenerife “Las Terecitas”. As we climb past San Andrés, a small fishing village, and go through the impressive mountain range of Anaga, we arrive at one of the most picturesque parts of the island, Taganana, a typical whitewashed village in a beautiful enclave where you can enjoy yourself with the local fresh fish for lunch (optional).

The history of the Canary islands
Dinner in the hotel
Observation 2 of the night sky.

Day 5

Arafo

These beautiful lands were occupied by the indigenous people before the European conquest. The isle is named after an ancient guanche chief. This area was densely populated by the guanches; various sepulchral and dwelling caves have been discovered in the canyons and amid the summits, as well as on the coast.

Dinner in the hotel
Free evening.

Day 6

Garachico Culture:

Aside from the stunning natural surroundings – Mount Teide, black sand coves, cliffs, verdant hillsides - into which it is nestled, what is it that makes Garachico so appealing? Garachico lives in a constant state of meticulously cared for, postcard-worthy perfection. Convents and noble mansions grace intimate plazas while traditional stucco **Canarian houses** - in cheerful shades of yellow, white, pink, orange and red – grace clean cobblestone streets, lined with flower pots. In fact, the architecture of historical Garachico has even garnered a Gold Medal for Fine Arts.

Garachico Beaches:

If you need a healthy dose of fun in the sun while you're in town, you can find unique **beaches** both in and around Garachico.

	<p>The Garachico region's coastline consists of six kilometers of quiet black sand coves surrounded by spectacular volcanic rock formations; El Muelle, La Caleta de Interian, Las Aguas and San Roque are just a few of the area's best.</p> <p>One of Garachico's most unique features, however, is known as "El Caletón." Located right next to the San Miguel Castle, it consists of a series of natural pools that have formed within the incredible rock formations left behind by volcanic eruptions long ago.</p> <p>Playa Tejita : the most beautiful natural beach of Tenerife</p> <p>Dinner in the hotel Free</p> <p><u>Day 7</u> Walking to Faro des Rasca, the southernmost point of the island Lunch in Las Galletas Free afternoon Dinner in the hotel Free evening</p> <p><u>Day 8</u> Packing bags and leaving the rooms Transfer to the airport Flight Arrival at Luxembourg The end</p>
<p>Environment activity(ies) if the trip is taken by plane Activité(s) pour l'environnement si le trajet a été effectué en avion Umweltaktivität(en), wenn als Verkehrsmittel das Flugzeug gewählt wird</p>	<p>Not yet defined</p>
<p>The projected CO₂ carbon footprint per person and per trip Emprunte carbone CO₂ pour le trajet et par personne CO₂-Fußabdruck pro Person für die zurückgelegte Reisestrecke</p>	<p>1463kg</p>

This is an example of a program. Some activities may change and of course the order of the activities can change too because some are weather dependent.
